To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:</p> <p>a) <input type="checkbox"/> The period for reply expires _____ months from the mailing date of the final rejection.</p> <p>b) <input checked="" type="checkbox"/> The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.</p> <p>Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).</p> <p>Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).</p> <p>NOTICE OF APPEAL</p> <p>2. <input type="checkbox"/> The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).</p> <p>AMENDMENTS</p> <p>3. <input type="checkbox"/> The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because</p> <p>(a) <input type="checkbox"/> They raise new issues that would require further consideration and/or search (see NOTE below);</p> <p>(b) <input type="checkbox"/> They raise the issue of new matter (see NOTE below);</p> <p>(c) <input type="checkbox"/> They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or</p> <p>(d) <input type="checkbox"/> They present additional claims without canceling a corresponding number of finally rejected claims.</p> <p>NOTE: _____. (See 37 CFR 1.116 and 41.33(a)).</p> <p>4. <input type="checkbox"/> The amendments are not in compliance with 37 CFR 1.121. Continuation of 11. does NOT place the application in condition for allowance because: Applicant states in the remarks regarding claim 1, "McCanne does not teach or suggest a method for configuring an overlay spanning tree, much less, defining a target bandwidth less than a maximum link bandwidth of the edges of the overlay spanning tree given a fully connected overlay distribution graph". Examiner respectfully disagrees. McCanne teaches "wherein determining the configuration of the overlay spanning tree comprises defining a target bandwidth less than a maximum link bandwidth of the edges of the overlay spanning tree given a fully connected overlay distribution graph (see paragraph 0033 lines 12-17)". It explains further, in paragraph 0047 and lines 1-11 where it states that the overlay model forward application-level flows in a bandwidth managed fashion. Therefore, routers will thin the the stream (i.e. to reduce the bandwidth as compare to the available bandwidth) to ensure that defined bandwidth constrains are adhered. Applicant states that "McCanne bandwidth constraint is not analogous to the claimed target bandwidth; the claimed target bandwidth is used as a threshold to remove edges having bandwidths below the threshold bandwidth(choke point in a process of configuring an overlay spanning tree)". Examiner respectfully disagrees. As explained before, McCanne teaches the claimed invention where it creates or configures the overlay router to perform stream thinning or reducing the bandwidth attains from the bandwidth allocator (further explained in paragraph 0109 lines 1-9).
